

## *Downloading Avenza Maps and KNS Maps to your mobile device*

- Iphone or android minimum system requirements IOS11 to use Avenza Maps
- Download and install **Avenza Maps free app** from the app store(iphone) or google play store(android).
- From the KNS Skiers website <http://www.kapnordicskiers.com/trail-maps.html> download the map(s).
- In **Avenza** press the + to add a map, several options to import the KNS map such as from iTunes, Storage location, or simply copy and paste the URL from the KNS website map page <http://www.kapnordicskiers.com/trail-maps.html> and download from that location.
- Click on the map to open and press the arrow bottom left corner to activate live location and blue circle identifies current location +- 15m approximately
- Tips: Location Services has to be turned on while using Avenza and it will only display your location if you are within the map extent, on the snowshoe or ski trails
- Other features such as recording your tracks, waypoints as you become familiar with the app...  
enjoy the trails!
